

## **How to install the zipper replacement**

1. First, take off the metal stops on the top of the zipper tape, both side of metal stops should be taken off.
2. Move the slider to the top the zipper tape, align the zipper teeth.
3. Install the slider into the zipper tape: make the left hand seize both side zipper tape, use your right hand to pull the slider down into the zipper teeth.
4. If it is tough to pull the slider into zipper teeth, you can use some wax and spay some oil to polish the zipper teeth to make it easier.
